

Introducing our new BusinessCap plans.

Mobile plans **designed for you,** not for your carrier.

At Macquarie Telecom, we build mobile plans that start with a simple question: what do our customers need? From there, we find a way to deliver value, flexibility, and service that doesn't force you to compromise.

Our BusinessCap 5 plans include more data for less money, new roaming packs that make it simple and cost effective to travel, and Mobile Broadband bundles that keep your tablet or laptop as mobile as your smartphone.

BusinessCap smartphone plans.

1GB

\$18 per month

Includes:
Unlimited calls +
text within Australia

5GB

\$25 per month

Unlimited calls +
text within Australia

30GB

\$45 per month

Includes:
Unlimited calls +
text within Australia

80GB

\$55 per month

Includes:
Unlimited calls +
text within Australia

Mix and match. Our plans are flexible.

At Macquarie Telecom, we know that different people need different servings of data. And that people's monthly data usage can vary dramatically, too.

That's why we aggregate your data and let you share it across all the users on your account. Just choose from two plan groups and mix and match the plans in that group. The total amount of data across all your plans is the amount everyone can share. Simple.

Mix any of these...

DATA

Global roaming. Without the heartache.

We make it easy to keep roaming under control.

While it's sometimes easy to find a Wi-Fi hotspot to do business overseas, we know that sometimes doesn't equal always. Our Global Roaming Day Packs make it easy to roam, and even easier to keep costs under control.

Here's how it works. We've created two roaming zones. Zone 1 includes 76 frequently visited countries, and Zone 2 covers another 25 destinations. Before travel, simply activate global roaming directly through our FleetView portal, and you'll automatically get access to the right day pack, wherever you go.

Each day pack includes unlimited voice calls and text messaging, so it's easy to stay in touch. You'll also get 200MB of data to use each day you travel, and because we're all about flexibility, your daily data quota will aggregate across your total travel time.

For the most up to date list of roaming destinations, take a look at our BusinessCap 5 global roaming brochure.

Daily cost	Countries	Data	Excess	Voice	SMS
\$10	76	200MB	\$10/500MB	Unlimited	Unlimited
\$30	25	200MB	\$0.75/MB	Unlimited	Unlimited

IDD calling that's simple.

No matter which plan you're using, you can add unlimited IDD calling and SMS for \$10 per service, per month.

Our unlimited bundle covers 45 countries including USA, UK, China, New Zealand, Singapore, Hong Kong, Japan and South Africa. Combined with unlimited national voice calls and text messaging, these plans offer plenty of freedom when talking's the only way to go.

IDD calling pack destinations

Mobile broadband.

The smartphone has become the centre of our business universe. But sometimes, you'll need a data-only SIM to power your iPad, laptop, or a data dongle. Macquarie Telecom Mobile Broadband plans provide value, true flexibility, and 4G data speeds. The data quota of each mobile broadband service even aggregates with data from your BusinessCap.
